DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 24-31 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

As to independent claims 24 and 28, the original specification fails to disclose determining a neighbor list of base stations for a mobile station based on a compiled database of strength of a pilot signal measured at **different mobile stations** as recited in the claims. The examiner believes that the original specification discloses determining a neighbor list of base stations for a mobile station based on a compiled database of strength of a pilot signal measured at **the same mobile station** that has the neighbor list of base stations to be determined. Applicant's attention is directed to the specification, page 8 line 21 to page 9 line 28 which discloses a mobile station 2 measures signal strength of pilot signals of base stations 4; page 9 line 29 to page 10 line 30 which discloses the mobile station 2 transmits the pilot strength measurement message to hand-off control processor 20; page 10 line 31 to page 11 line 15 which discloses the hand-off control processor 20 determines which base stations should be in active communication with mobile station 2 based on the information in the pilot strength

measurement message. Therefore, it is clear from the specification that a neighbor list of base stations for a mobile station is not determined based on compiled database of strength of a pilot signal measured at **different mobile stations** as recited in the claims.

In addition, the examiner recognizes that the system in figure 1 has a plurality of mobile stations 2. However, the fact that the system has a plurality of mobile stations does not explain how/why a neighbor list of base stations for a mobile station is determined based on compiled database of strength of a pilot signal measured at **different mobile stations**.

Response to Arguments

3. Applicant's arguments with respect to claims 24-31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
